

The Further Path:

Advancing Faery Ritual Magic for the 21st Century and Beyond

Drawing on R.J.'s forthcoming faery ritual magic book, *The Further Path*, this workshop takes us into new territory for new times. Here are some excerpts from the book, indicating what we will be exploring together in the workshop: "We are experiencing inevitable and irredeemable change in human society worldwide. A combination of interleaved human and environmental crises has pushed millions of people out of their homelands to wander and seek asylum..."

"What, you may ask, has any of this got to do with faeries? Well, it depends on how you think of faeries. If you are interested in costume products and fantasy events, read no further. This workshop is not for you".

In times of great change, our environmental magic will also change. Faery tradition is an ancient spiritual and sacramental stream; it has always been concerned with the interaction between humanity and the spiritual forces of the land and sea, leading to a deeper interaction with planetary forces, especially the Earth Light in planetary core.

The Further Path

Think Big, Act Small We will explore the wisdom tale of the Magical Wall with the Gates of Sunrise to Midnight. We will experience how to network small scale magic into large scale transformation. We will come into contact with a real-time active network of Faery Allies and powerful Co-Walkers. So if this is the kind of faery ritual magic that interests you, come and join us for this workshop, which will lead you to *The Further Path*.
